
VIRTUAL SEOUL

PLAYGROUND 

USER GUIDE

OVERVIEW

Virtual Seoul Playground is **an online game played with avatars in the metaverse Seoul**. Explore traditional Korean culture through an exciting tour on this 3D virtual Seoul as an avatar while enjoy playing Yunnori, making Gimbap, and decorating a lantern with your teammates right now!

INTRODUCTION

Players can create their own avatars with traditional Korean costumes representing different roles and professions.

Players can explore Seoul's iconic landmarks virtually created in 3D graphics at anytime and anywhere.

OVERVIEW

GAMES

Yunnori

You can play the traditional Korean board game Yunnori on Seoul city hall, using Seoul's famous landmarks (Changdeokgung Place, Seoul Botanic Garden, DDP and Floating Islands) as pawns.

Making Gimbap

In the beautiful traditional architecture Changdeokgung Palace, you can play mini-games to collect ingredients for gimbap such as cooked rice, chopped vegetables, and seaweed sheets, with your teammates.

Light your Seoul lantern

You can create a lantern with various symbols of Seoul like N Seoul Tower. You collect items to decorate the lantern by solving a quiz about Seoul and launch it on the Hangang River with your wish written on it.

OVERVIEW

FEATURES

Group-oriented

A group of **two to six participants** can play the games simultaneously in teams.

Real-time chat

Teammates can communicate real-time through **voice, texts or Emojis** during the games.

※ Use Korean or English for text-based chat.

Social sharing

Players can store **screen shots of the game results with hashtags** and share the image on social media.

USAGE OF THE GAME

HOW TO USE

To increase immersion and participation in virtual events through gamification*.

To extend event promotions and marketing effects on social media through sharing game photo with hashtags.

To improve teamwork through team building solutions promoting collaboration and competition among teammates.

※ Gamification is adding game mechanics such as cooperation, competition and rewards into nongame environments to encourage problem solving, to attract interest or to effectively deliver information.
